

Monthly Update

Fund Commentary

Fund performance was strong during the period with both the underlying equity portfolio and currency contributing positively.

Gaming holdings once again contributed meaningfully to performance. MGM China (+9%) and Wynn Macau (+8%) both announced Q1/ 2017 results that were above expectations resulting in another upgrade to consensus earnings expectations. Donaco International (+23%) also advanced after lagging its regional peers over the past year. Subsequent to the end of the period Donaco released a trading update highlighting a robust operating performance, particularly in the early part of this year.

Chinese online employment classifieds and recruitment company 51Jobs (+12%) also performed strongly despite the

lack of any specific news. We believe the increased attention paid to the sector in recent months with the privatisation of Zhaopin and improved perception of the Chinese economy has been beneficial in drawing attention to 51Jobs.

We reduced our Macau holdings over the month after the recent earnings upgrades and associated share price strength. Despite the partial sell down, gaming remains a core investment theme within the portfolio. We reinvested part of the proceeds to Turquoise Hill Resources.

PM Capital Limited, founded in 1998, is a globally-focussed fund manager that invests money on behalf of private clients, the clients of financial advisers and institutions. PM Capital's goal is to build long term wealth by investing in global markets with patience and conviction.

Investment philosophy

We aim to build long term wealth together with our co-investors by finding and exploiting investment anomalies. Using a focused, patient and considered approach to finding simple investment ideas produces the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. This mispricing can arise as a result of any number of reasons, but is most often associated with disruptive or cyclical change, new information which is misunderstood by the market as having a permanent impact when it is in fact transitory, or just because they are operating in a sector out of favour with investors.

Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Who manages the investment?

Kevin Bertoli is the Portfolio Manager, who has over 11 years industry experience and has managed the Fund since its inception. Kevin is supported by a team of experienced investment analysts. The investment team is led by founder and CIO Paul Moore who has over 30 years' experience in successfully managing investment funds.

Further Information

We believe in being a patient investor, one that has conviction, one that sees opportunities where others only see risk. We only invest in what we know, deeply, via our fundamental research.

Why the Asian Companies Fund?

Asia-specific: The Fund focuses on companies listed or operating in Asia (ex-Japan), giving 100% unrestricted exposure to the world's fastest growing region.

Established: The Fund's process has been shown to be effective, based on a philosophy developed by Paul Moore, over 30 years. This has produced attractive long term capital growth.

Unrestricted: We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify in individual stocks. No conviction at the stock level = no investment.

Opportunistic and focused: The Fund is not built around a general market benchmark or index - it is highly focused based on our fundamental, bottom-up investment process. As a guide, the Fund holds around 15 - 35 deeply researched stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: Our co-investors receive access to a unique subset of opportunities to which they may otherwise find difficult to access. The management team have significant investments in the Fund - they invest for and with you.

Outperformance: The Fund *has outperformed the relevant market index by 175% since inception*. The Fund is managed from an Australian investor's perspective with consideration for tax and currency outcomes.

Key Company Details

The Fund may be appropriate for investors seeking long-term capital appreciation over a seven plus year investment horizon through a concentrated portfolio of Asian Equities

Important Notice

This Report is issued by PM Capital Limited ABN 69 083 644 731 AFSL 230222 as responsible entity for the PM CAPITAL Asian Companies Fund (ARSN 130 588 439, the 'Fund'). It contains summary information only to provide an insight into how we make our investment decisions. This information does not constitute advice or recommendations, and is subject to change without notice. It does not take into account the objectives, financial situation or needs of any investor which should be considered before investing. Investors should consider a copy of the current Product Disclosure Statement which available from us, and seek their own financial advice prior to investing. The PDS explains how the Fund's Net Asset Value is calculated. Past performance is not a reliable guide to future performance and the capital and income of any investment may go down as well as up due to various market forces. The investment objective is not a forecast, and is only an indication of what the investment strategy aims to achieve over the medium to long term.

1. Returns are calculated from exit price to exit price assuming the reinvestment of distributions for the period as stated and represent the combined income and capital return. The Index is the MSCI All Country Asia ex Japan Net Total Return Index in Australian dollars, net dividends reinvested. See www.msci.com for further information on the Index.
