

# Monthly Update

## Fund Commentary

Macau's gross gaming revenues advanced 18% year-over-year in March, well above expectations. This drove strong performances from portfolio holdings Wynn Macau and MGM China during the month.

Despite the strong performance from our Macau holdings over the past 12 months, the recovery from the severe cyclical correction experienced between 2014 and 2015 is still in its infancy and will continue to play out over the next two to three years. We expect the Macau gaming sector to experience another round of consensus earnings upgrades following what should be a strong Q1/17 results season announced in April.

iCar Asia recovered from its 12 month lows in February after management commentary during the company's full year results roadshow suggested the operating environment in its core markets have stabilised and begun to improve after a

difficult 2016. The company also made changes at the board level, appointing former iProperty Group CEO Georg Chmiel to the position of Chairman which we view as positive given his extensive experience in the online classified space.

We exited our position in Genting Malaysia after a period of strong share price appreciation spurred by growing optimism around its recently expanded Malaysian operations. A portion of the proceeds from the sale of Genting were invested in Dali Foods, increasing the holding to a core 5%.

PM Capital Limited, founded in 1998, is a globally-focussed fund manager that invests money on behalf of private clients, the clients of financial advisers and institutions. PM Capital's goal is to build long term wealth by investing in global markets with patience and conviction.

### Investment philosophy

We aim to build long term wealth together with our co-investors by finding and exploiting investment anomalies. Using a focused, patient and considered approach to finding simple investment ideas produces the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. This mispricing can arise as a result of any number of reasons, but is most often associated with disruptive or cyclical change, new information which is misunderstood by the market as having a permanent impact when it is in fact transitory, or just because they are operating in a sector out of favour with investors.

Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

### Who manages the investment?

Kevin Bertoli is the Portfolio Manager, who has over 11 years industry experience and has managed the Fund since its inception. Kevin is supported by a team of experienced investment analysts. The investment team is led by founder and CIO Paul Moore who has over 30 years' experience in successfully managing investment funds.

We believe in being a patient investor, one that has conviction, one that sees opportunities where others only see risk. We only invest in what we know, deeply, via our fundamental research.

### Why the Asian Companies Fund?

**Asia-specific:** The Fund focuses on companies listed or operating in Asia (ex-Japan), giving 100% unrestricted exposure to the world's fastest growing region.

**Established:** The Fund's process has been shown to be effective, based on a philosophy developed by Paul Moore, over 30 years. This has produced attractive long term capital growth.

**Unrestricted:** We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify in individual stocks. No conviction at the stock level = no investment.

**Opportunistic and focused:** The Fund is not built around a general market benchmark or index - it is highly focused based on our fundamental, bottom-up investment process. As a guide, the Fund holds around 15 - 35 deeply researched stocks that we believe give the best opportunity to produce strong long term returns.

**Co-investment:** Our co-investors receive access to a unique subset of opportunities to which they may otherwise find difficult to access. The management team have significant investments in the Fund - they invest for and with you.

**Outperformance:** The Fund *has outperformed the relevant market index by 164% since inception*. The Fund is managed from an Australian investor's perspective with consideration for tax and currency outcomes.

### Key Company Details

#### Fund category

Asian equities

#### Investment style

Fundamental, bottom-up research intensive approach

#### Inception date

1 July 2008

#### Fund size

\$18.1 Million

#### Strategy size

\$77.9 Million

#### Number of stocks

As a guide, 15-35 stocks
