

Monthly Update

31 JANUARY 2018

Fund commentary

- Exited our investment in Heineken – our final holding in the brewing industry
- US Dollar weaker against all major currencies

The portfolio performed strongly over the month, with the main positive contributors being the banks, the alternative asset managers and our Macau gaming positions. The detractors included our US homebuilding companies and our exposure to the US Dollar.

We exited our final holding in the brewing industry over the month, selling our remaining position in Heineken. It is a rather historic moment, with this investment theme first implemented by PM Capital in 2004 and going on to include 16 different stocks spanning Europe, the Americas, Asia and Australia. The original investment theme was simple. We observed there were premium beer brands emerging on low valuations,

allowing for industry consolidation and a positive pricing environment. This has acted as a significant tailwind for the underlying businesses. The story has now largely played out. We think current valuations now require a continuation of very strong earnings growth to satisfy market expectations, so risk is now to the downside if there are earnings disappointments.

The US Dollar weakened across all the major currencies over the month. The Australian Dollar rose over 3% against the US Dollar, detracting from some of the portfolio's positive return over the month.

PM Capital Limited, founded in 1998, is a globally-focussed fund manager that invests money on behalf of private clients, the clients of financial advisers and institutions. PM Capital's goal is to build long term wealth by investing in global markets with patience and conviction.

Investment philosophy

We aim to build long term wealth together with our co-investors by finding and exploiting investment anomalies. Using a focused, patient and considered approach to finding simple investment ideas produces the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. This mispricing can arise as a result of any number of reasons, but is most often associated with disruptive or cyclical change, new information which is misunderstood by the market as having a permanent impact when it is in fact transitory, or just because they are operating in a sector out of favour with investors.

Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Who manages the investment?

The investment team is led by founder and CIO Paul Moore who has over 30 years experience in successfully managing investment funds. Paul Moore, the Portfolio Manager for this Fund is supported by a team of experienced investment analysts.

We believe in being a patient investor, one that has conviction, one that finds opportunities where others can only see risk. We only invest in what we know, deeply, via our fundamental research.

Why the Global Companies Fund?

Established: The Fund's process has been shown to be effective, based on a philosophy developed by Paul Moore, over 30 years. This has produced attractive long term capital growth.

Unrestricted: We have an authentic investment process where our exposure to industry sectors, geographic regions or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify within portfolio guidelines. No conviction = no investment.

Opportunistic and focused: The Fund is not built around a general market benchmark or index - it is highly focused based on our fundamental, bottom-up investment process. As a guide, the Fund holds around 25 - 45 deeply researched stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: Our co-investors receive access to a unique subset of opportunities to which they would otherwise find difficult to access. The management team have significant investments in the Fund - they invest for and with you.

Outperformance: The Fund *has outperformed the relevant market index by 303% since inception*. The Fund is managed from an Australian investor's perspective with consideration for tax and currency outcomes.

Key Company Details

Fund category

Global equities

Investment style

Fundamental, bottom-up research intensive approach

Inception date

28 October 1998

Fund size

\$389.6 Million

Strategy size

\$1,070.3 Million

Number of stocks

As a guide, 25-45 stocks

Minimum direct investment

\$20,000

Buy / sell spread

0.5% (Round trip)

Investor profile

The Fund may be appropriate for investors seeking capital appreciation over a seven plus year investment horizon

Important Notice

This Report is issued by PM Capital Limited ABN 69 083 644 731 AFSL 230222 as responsible entity for the PM Capital Global Companies Fund (ARSN 092 434 618, the 'Fund'). It contains summary information only to provide an insight into how we make our investment decisions. This information does not constitute advice or recommendations, and is subject to change without notice. It does not take into account the objectives, financial situation or needs of any investor which should be considered before investing. Investors should consider a copy of the current Product Disclosure Statement which is available from us, and seek their own financial advice prior to investing. The PDS explains how the Fund's Net Asset Value is calculated. Past performance is not a reliable guide to future performance and the capital and income of any investment may go down as well as up due to various market forces. The investment objective is not a forecast, and is only an indication of what the investment strategy aims to achieve over the medium to long term. 1. Returns are calculated from exit price to exit price assuming the reinvestment of distributions for the period as stated and represent the combined income and capital return. The Index is the MSCI World Net Total Return Index in Australian dollars, net dividends reinvested. See www.msci.com for further information on the Index.
