

Net Tangible Assets & Monthly Investment Report

28 FEBRUARY 2018

Company commentary

A strong results season from several of the portfolio holdings benefited returns despite volatility in markets.

Baidu rose 2% (19% from month lows) after releasing strong fourth quarter results. Revenues came in at top end of guidance while margins beat expectations on declining investment in online-to-offline (O2O) services. Baidu has lagged its large cap China internet peers in large part due to stagnant growth in its core search revenues and its ongoing investment in loss making O2O services. We now see these two overhangs clearing, driving improved earnings growth momentum.

Nagacorp advanced 12% after second half 2017 results beat consensus expectations by a wide margin. Earnings Before Interest and Tax (EBIT) growth of 37% y/y was supported

by the opening of the company's Naga2 property in Phnom Penh. Naga2 only opened in early November 2017 therefore we expect the property's ramp up phase to continue through 2018 and support strong growth in underlying earnings this year.

DBS Group rose 9% after surprising the market positively with a material increase in its capital returns policy at its full year result. DBS Group's CET1 still remains comfortably above management's target of 13% so we are likely to see more shareholder friendly initiatives going forward. Improving capital management has be a key pillar of our increased investment into financials over the past one to two years.

Net Tangible Asset (NTA) backing per ordinary share (all figures are unaudited)	January 2018	February 2018 (cum)³	February 2018 (ex) ⁴	Change⁵
NTA before tax accruals plus franking credits¹	1.3181	1.3230	1.2885	+ 0.37 %
NTA after tax ²	1.2249	1.2285	1.2035	+ 0.29 %

1. 28 February 2018 includes \$0.0261 of franking credits. 2. Net Tangible Assets (NTA) refers to the net assets of the Company after the accruals for net current and deferred tax liabilities/assets. 3. NTA on a notional cum-dividend basis for the fully franked interim dividend of 2.5cps. 4. NTA on a notional ex-dividend basis. 5. Change calculated on a cum-dividend basis.

PM Capital Limited ('the Manager'),

founded in 1998, is a globallyfocussed fund manager that invests money on behalf of private clients, the clients of financial advisers and institutions. PM Capital's goal is to build long term wealth by investing in global markets with patience and conviction.

Company profile

The PM Capital Asian Opportunities Fund Limited (ASX:PAF, ACN 168 666 171) is intended to provide investors with an opportunity to invest in the Asian Region (ex-Japan)¹ via an Australian Securities Exchange (ASX) listed investment company. The company began trading on the ASX on 22 May 2014.

Managed by PM Capital Limited, the aim is to create long term wealth through a concentrated portfolio of typically 15-35 quality companies within Asia ex-Japan that we believe are trading at prices different to their intrinsic values.

Who manages the Company's portfolio?

PAF's investment portfolio is managed by PM Capital (AFSL 230222). Kevin Bertoli is the Portfolio Manager, who has over 11 years' industry experience and is supported by a team of experienced investment analysts. The investment team is led by founder and CIO Paul Moore who has over 30 years' experience in successfully managing investment funds.

PM Capital believes in being a patient investor, one that has conviction, one that finds opportunities where others can only see risk. We only invest in what we know, deeply, via our fundamental research.

Investment philosophy

PM Capital aims to build long term wealth together with our co-investors by finding and exploiting investment anomalies around the world. Using a focused, patient and considered approach to finding simple investment ideas produces the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time

Why the PM Capital Asian **Opportunities Fund Limited?**

Asia-specific: The Company focuses on companies listed or operating in Asia (ex-Japan)¹, giving 100% unrestricted exposure to the world's fastest growing region.

Established: The Company's process has been shown to be effective, based on a philosophy developed by Paul Moore, over 30 years. This has produced attractive long term capital growth.

Unrestricted: We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/ reward opportunities that we identify in individual stocks.

Opportunistic and focused: The

Company's portfolio is not built around a general market benchmark or index - it is highly focused based on our fundamental, bottom-up investment process. As a guide, the portfolio holds around 15 to 35 deeply researched stocks that we believe give the best opportunity to produce strong long term returns

Co-investment: Shareholders receive access to a unique subset of opportunities to which they may otherwise find difficult to access. The Manager has a significant investments in the Company - they invest for and with
