

# Net Tangible Assets & Monthly Investment Report

30 NOVEMBER 2017

## Company commentary

Holdings within the gaming thematic were mixed during the month.

Portfolio takes up its iCar Asia rights issue allocation.

New position – South Korean cosmetics company Amorepacific Corporation.

iCar Asia announced a fully underwritten A\$10 million rights issue during the month. Participating shareholders will also receive an attached option which has the potential to raise another A\$10 million within the next 18 months. This raising strengthens the company's balance sheet, ensuring management has adequate scope and flexibility to continue investing in the recent initiatives it outlined to the market. The portfolio will take up its pro rata allocation in the rights issue.

Holdings within the gaming thematic were mixed during the month. Donaco International declined after management provided a disappointing trading update to investors at their AGM, while strong performances from our Macau holdings –

Wynn Macau, MGM China and Las Vegas Sands – offset this negative impact.

Recent geopolitical tensions between South Korea and China provided us with the opportunity to initiate a position South Korean cosmetics company Amorepacific Corporation. While tensions look to be easing it is always difficult to time these issues in the short term. Taking a longer term view it has always been our belief that these issues are transitory and do not fundamentally impact the long term competitive position of the Company which commands a leading position in the 'Korean cosmetics' market.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.
