

Net Tangible Assets & Monthly Investment Report

31 JANUARY 2018

Company commentary

- Exited our investment in Heineken – our final holding in the brewing industry
- US Dollar weaker against all major currencies

The portfolio performed strongly over the month, with the main positive contributors being the banks, the alternative asset managers and our Macau gaming positions. The detractors included our US homebuilding companies and our exposure to the US Dollar.

We exited our final holding in the brewing industry over the month, selling our remaining position in Heineken. It is a rather historic moment, with this investment theme first implemented by PM Capital in 2004 and going on to include 16 different stocks spanning Europe, the Americas, Asia and Australia. The original investment theme was simple. We observed there were premium beer brands emerging on low valuations,

allowing for industry consolidation and a positive pricing environment. This has acted as a significant tailwind for the underlying businesses. The story has now largely played out. We think current valuations now require a continuation of very strong earnings growth to satisfy market expectations, so risk is now to the downside if there are earnings disappointments.

The US Dollar weakened across all the major currencies over the month. The Australian Dollar rose over 3% against the US Dollar, detracting from some of the portfolio's positive return over the month.

Net Tangible Asset (NTA) backing per ordinary share (all figures are unaudited)	December 2017	January 2018	Change
NTA before tax accruals plus franking credits ¹	1.3506	1.3851	+ 2.55%
NTA after tax ²	1.2490	1.2733	+ 1.95%

1. 31 January 2018 includes \$0.0168 of franking credits. 2. Net Tangible Assets (NTA) refers to the net assets of the Company after the accruals for net current and deferred tax liabilities/assets.

PM Capital Limited (‘the Manager’), founded in 1998, is a globally-focussed fund manager that invests money on behalf of private clients, the clients of financial advisers and institutions. PM Capital’s goal is to build long term wealth by investing in global markets with patience and conviction.

Company profile

The PM Capital Global Opportunities Fund Limited (ASX:PGF, ACN 166 064 875) provides investors with an opportunity to invest in global equities via an Australian Securities Exchange (ASX) listed investment company. The company began trading on the ASX on 12 December 2013.

Managed by PM Capital Limited, the aim is to create long term wealth through a concentrated portfolio of around 40 global companies that we believe are trading at prices different to their intrinsic values.

Who manages the Company’s portfolio?

PGF’s investment portfolio is managed by PM Capital (AFSL 230222). The investment team is led by founder and CIO Paul Moore who has over 30 years’ experience in successfully managing investment funds. Paul Moore is the Portfolio Manager and is supported by a team of experienced investment analysts.

PM Capital believes in being a patient investor, one that has conviction, one that finds opportunities where others can only see risk. We only invest in what we know, deeply, via our fundamental research.

Investment philosophy

PM Capital aims to build long term wealth together with our co-investors by finding and exploiting investment anomalies around the world. Using a focused, patient and considered approach to finding simple investment ideas produces

the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Why the PM Capital Global Opportunities Fund Limited?

Established: The Company’s process has been shown to be effective, based on a philosophy developed by Paul Moore, over 30 years. This has produced attractive long term capital growth.

Unrestricted: We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify in individual stocks. No conviction at the stock level = no investment.

Opportunistic and focused: The Company’s portfolio is not built around a general market benchmark or index – it is highly focused based on our fundamental, bottom-up investment process. As a guide, the portfolio holds around 40 deeply researched stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: Shareholders receive access to a unique subset of opportunities to which they may otherwise find difficult to access. The Manager has a significant investment in the Company – they invest for and with you.

Key Company Details
