

Net Tangible Assets & Monthly Investment Report

31 JULY 2017

Company commentary

While stock selection positively contributed to returns, the portfolio fell due to the rally in the value of the Australian Dollar versus the US Dollar.

Stock selection added to portfolio returns in July. Our Spanish property and banking investments all performed strongly as Spain's growth continues to outpace expectations; it is now the fastest growing large economy in Europe. We have gained our exposure to Spanish hotels through investments in Hispania and NH Hotels. Both are experiencing double digit revenue per available room (RevPAR) growth as tourist numbers grow 11%, in addition to increased internal demand.

The Macau gaming sector sold off in July despite results being broadly in line with consensus across the sector. The market was clearly looking for the sector to again beat earnings

expectations to lift 2017 forecasts. Our main focus continues to be underlying gross gaming revenue trends which we see as improving.

Currency movements affected our overall performance. The Australian Dollar was up 4% in July as Australian long term interest rates continued to rise. During the month the Reserve Bank of Australia quashed any hope of a rate cut, while recent rises in commodity prices also boosted the local currency. Iron ore continued its rebound with prices rising close to 20% over the month.

Net Tangible Asset (NTA) backing per ordinary share (all figures are unaudited)	June 2017	July 2017	Change
NTA before tax accruals plus franking credits ¹	\$1.2445	\$1.2230	- 1.73%
NTA after tax ²	\$1.1742	\$1.1591	- 1.29%

1. 30 June 2017 includes \$0.0223 of franking credits.

2. Net Tangible Assets (NTA) refers to the net assets of the Company after the accruals for net current and deferred tax liabilities/assets.

PM Capital Limited (‘the Manager’), founded in 1998, is a globally-focussed fund manager that invests money on behalf of private clients, the clients of financial advisers and institutions. PM Capital’s goal is to build long term wealth by investing in global markets with patience and conviction.

Company profile

The PM Capital Global Opportunities Fund Limited (ASX:PGF, ACN 166 064 875) provides investors with an opportunity to invest in global equities via an Australian Securities Exchange (ASX) listed investment company. The company began trading on the ASX on 12 December 2013.

Managed by PM Capital Limited, the aim is to create long term wealth through a concentrated portfolio of around 40 global companies that we believe are trading at prices different to their intrinsic values.

Who manages the Company’s portfolio?

PGF’s investment portfolio is managed by PM Capital (AFSL 230222). The investment team is led by founder and CIO Paul Moore who has over 30 years’ experience in successfully managing investment funds. Paul Moore is the Portfolio Manager and is supported by a team of experienced investment analysts.

PM Capital believes in being a patient investor, one that has conviction, one that finds opportunities where others can only see risk. We only invest in what we know, deeply, via our fundamental research.

Investment philosophy

PM Capital aims to build long term wealth together with our co-investors by finding and exploiting investment anomalies around the world. Using a focused, patient and considered approach to finding simple investment ideas produces

the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Why the PM Capital Global Opportunities Fund Limited?

Established: The Company’s process has been shown to be effective, based on a philosophy developed by Paul Moore, over 30 years. This has produced attractive long term capital growth.

Unrestricted: We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify in individual stocks. No conviction at the stock level = no investment.

Opportunistic and focused: The Company’s portfolio is not built around a general market benchmark or index – it is highly focused based on our fundamental, bottom-up investment process. As a guide, the portfolio holds around 40 deeply researched stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: Shareholders receive access to a unique subset of opportunities to which they may otherwise find difficult to access. The Manager has a significant investment in the Company – they invest for and with you.

Key Company Details
