

Net Tangible Assets & Monthly Investment Report

31 MARCH 2017

Company commentary

CaixaBank rose strongly on the back of rising European interest rates and a strengthening Spanish economy.

While US long term rates were reasonably flat over the month, European rates rose sharply as good growth and inflation numbers continued to come through. Spanish banks are the most positively exposed to rising rates as the vast majority of their loan assets are priced off floating rates.

Our global strategy holds CaixaBank, the leading domestically focused retail banking franchise in Spain. It also commands market leading positions in insurance, payments and asset management. It is well capitalised and perfectly positioned to take advantage of being the number one player in Europe's fastest growing large economy.

Our Macau gaming names, in particular Wynn Macau, advanced as gaming revenues continue to recover from the severe cyclical correction experienced in 2014 and 2015.

During the month we sold out of our position in Fortress Investment Management, crystallising a 40% gain on our investment. We also sold out of a long term holding in Anheuser-Busch Inbev as we believe its current valuation fairly reflects the stock's growth outlook.

Overall, the strategy had a strong month driven by our holdings in European banks and Macau gaming companies.

Net Tangible Asset (NTA) backing per ordinary share (all figures are unaudited)	February 2017 (cum) ¹	February 2017 (ex) ²	March 2017 (ex) ²	Change ³
NTA before tax accruals plus franking credits	\$1.1479	\$1.1250	\$1.1783	+4.74%

PM Capital Limited (the Manager), founded in 1998, is a globally-focussed fund manager that invests money on behalf of private clients, the clients of financial advisers and institutions. PM Capital's goal is to build long term wealth by investing in global markets with patience and conviction.

Company profile

The PM Capital Global Opportunities Fund Limited (ASX:PGF, ACN 166 064 875) provides investors with an opportunity to invest in global equities via an Australian Securities Exchange (ASX) listed investment company. The company began trading on the ASX on 12 December 2013.

Managed by PM Capital Limited, the aim is to create long term wealth through a concentrated portfolio of 25-45 global companies that we believe are trading at prices different to their intrinsic values.

Who manages the Company's portfolio?

PGF's investment portfolio is managed by PM Capital. The investment team is led by founder and CIO Paul Moore who has over 30 years' experience in successfully managing investment funds. Paul Moore is the Portfolio Manager and is supported by a team of experienced investment analysts.

We believe in being a patient investor, one that has conviction, one that finds opportunities where others can only see risk. We only invest in what we know, deeply, via our fundamental research.

Investment philosophy

We aim to build long term wealth together with our co-investors by finding and exploiting investment anomalies around the world. Using a focused, patient and considered approach to finding simple investment ideas produces

the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Why the PM Capital Global Opportunities Fund Limited?

Established: The Company's process has been shown to be effective, based on a philosophy developed by Paul Moore, over 30 years. This has produced attractive long term capital growth.

Unrestricted: We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify in individual stocks. No conviction at the stock level = no investment.

Opportunistic and focused: The Company's portfolio is not built around a general market benchmark or index - it is highly focused based on our fundamental, bottom-up investment process. As a guide, the portfolio holds around 40 deeply researched stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: Our co-investors receive access to a unique subset of opportunities to which they would otherwise find difficult to access. The management team have significant investments in the Company - they invest for and with you.

Key Company Details

ASX Code

PGF

ACN

166 064 875
