

Net Tangible Assets & Monthly Investment Report

31 MAY 2017

Company commentary

Holdings in our European property investment theme drove a positive performance over the month.

The Net Tangible Assets (NTA) of the Company rose 1.9% over the month. Positive contributors for the month included our holdings in Spanish property investments, namely NH Hotels, LAR Espana and Hispania. Our position in Alphabet (+6.5% for the month) contributed strongly. The Company's returns were also assisted by the Australian Dollar's fall against the US Dollar.

The Spanish economy continues to perform above Eurozone peers post its severe cyclical correction during the European crisis. Our investments in the Spanish hotel sector are performing very strongly, with

the level of growth in the sector supported by Spain receiving a record number of tourists in 2016 - 75 million visitors. Hotel revenue per available room (RevPAR) is growing in the double digit range. The domestic economy is now also beginning to build momentum - employment growth is leading to increasing consumer confidence and retail sales are achieving mid-single digit growth rates. We believe that Spain remains in the early-to-mid-stage of its economic recovery and thus we continue to hold our exposure to Spanish property companies.

Net Tangible Asset (NTA) backing per ordinary share (all figures are unaudited)	April 2017	May 2017	Change
NTA before tax accruals plus franking credits	\$1.2379	\$1.2610	+ 1.87%
NTA after tax	\$1.1689	\$1.1856	+ 1.43%

PM Capital Limited (‘the Manager’), founded in 1998, is a globally-focussed fund manager that invests money on behalf of private clients, the clients of financial advisers and institutions. PM Capital’s goal is to build long term wealth by investing in global markets with patience and conviction.

Company profile

The PM Capital Global Opportunities Fund Limited (ASX:PGF, ACN 166 064 875) provides investors with an opportunity to invest in global equities via an Australian Securities Exchange (ASX) listed investment company. The company began trading on the ASX on 12 December 2013.

Managed by PM Capital Limited, the aim is to create long term wealth through a concentrated portfolio of around 40 global companies that we believe are trading at prices different to their intrinsic values.

Who manages the Company’s portfolio?

PGF’s investment portfolio is managed by PM Capital (AFSL 230222). The investment team is led by founder and CIO Paul Moore who has over 30 years’ experience in successfully managing investment funds. Paul Moore is the Portfolio Manager and is supported by a team of experienced investment analysts.

PM Capital believes in being a patient investor, one that has conviction, one that finds opportunities where others can only see risk. We only invest in what we know, deeply, via our fundamental research.

Investment philosophy

PM Capital aims to build long term wealth together with our co-investors by finding and exploiting investment anomalies around the world. Using a focused, patient and considered approach to finding simple investment ideas produces

the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Why the PM Capital Global Opportunities Fund Limited?

Established: The Company’s process has been shown to be effective, based on a philosophy developed by Paul Moore, over 30 years. This has produced attractive long term capital growth.

Unrestricted: We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify in individual stocks. No conviction at the stock level = no investment.

Opportunistic and focused: The Company’s portfolio is not built around a general market benchmark or index – it is highly focused based on our fundamental, bottom-up investment process. As a guide, the portfolio holds around 40 deeply researched stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: Shareholders receive access to a unique subset of opportunities to which they may otherwise find difficult to access. The Manager has a significant investment in the Company – they invest for and with you.

Key Company Details
