

Monthly Update

31 JULY 2018

Fund commentary

- Positive contributors to performance included Nagacorp, Dali Foods and Astro Malaysia.
- MGM China and Amorepacific detracted.

Nagacorp advanced 24% after earnings comfortably beat expectations. It saw a material uplift to underlying earnings since the opening of its second casino in Phnom Penh last November. Adjusted EBITDA and net profit grew 92% and 99% y/y respectively in the first half, with earnings 30% above consensus.

Chinese consumer foods company Dali Foods rose 9% following a positive update by management regarding recent and upcoming product launches. Dali has a strong pipeline of product launches coming over the next 12 months which will drive strong earnings growth over the next 2-3 years. Despite Dali's strong earnings outlook and innovation track record it trades at a discount to peers which we expect to close over time.

Astro Malaysia, which has performed poorly in recent months, rebounded 15% after speculation it was now an attractive candidate for privatisation by its controlling shareholder/founder.

Amorepacific (preferred shares) fell 8% after announcing weaker than anticipated earnings. Over the past year Amorepacific has been impacted by the geopolitical tensions between South Korea and China which makes predicting earnings short term difficult. We continue to view the underlying business favourably and are focused on its normalised earnings profile in 3-5 years as opposed to next quarter.

PM Capital Limited, founded in 1998, is a globally-focussed fund manager that invests money on behalf of private clients, the clients of financial advisers and institutions. PM Capital's goal is to build long term wealth by investing in global markets with patience and conviction.

Investment philosophy

We aim to build long term wealth together with our co-investors by finding and exploiting investment anomalies. Using a focused, patient and considered approach to finding simple investment ideas produces the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. This mispricing can arise as a result of any number of reasons, but is most often associated with disruptive or cyclical change, new information which is misunderstood by the market as having a permanent impact when it is in fact transitory, or just because they are operating in a sector out of favour with investors.

Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Who manages the investment?

Kevin Bertoli is the Portfolio Manager, who has over 12 years industry experience and has managed the Fund since its inception. Kevin is supported by a team of experienced investment analysts. The investment team is led by founder and CIO Paul Moore who has over 31 years' experience in successfully managing investment funds.

Further Information

We believe in being a patient investor, one that has conviction, one that sees opportunities where others only see risk. We only invest in what we know, deeply, via our fundamental research.

Why the Asian Companies Fund?

Asia-specific: The Fund focuses on companies listed or operating in Asia (ex-Japan), giving 100% unrestricted exposure to the world's fastest growing region.

Established: The Fund's process has been shown to be effective, based on a philosophy developed by Paul Moore, over 31 years. This has produced attractive long term capital growth.

Unrestricted: We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify in individual stocks. No conviction at the stock level = no investment.

Opportunistic and focused: The Fund is not built around a general market benchmark or index - it is highly focused based on our fundamental, bottom-up investment process. As a guide, the Fund holds around 15 - 35 deeply researched stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: Our co-investors receive access to a unique subset of opportunities to which they may otherwise find difficult to access. The management team have significant investments in the Fund - they invest for and with you.

Outperformance: The Fund *has outperformed the relevant market index by 197% since inception*. The Fund is managed from an Australian investor's perspective with consideration for tax and currency outcomes.

Key Fund Details

Fund category

Asian equities

Investment style

Fundamental, bottom-up research intensive approach

Inception date

1 July 2008

The Fund may be appropriate for investors seeking long-term capital appreciation over a seven plus year investment horizon through a concentrated portfolio of Asian Equities.

Important Notice

This Report is issued by PM Capital Limited ABN 69 083 644 731 AFSL 230222 as responsible entity for the PM CAPITAL Asian Companies Fund (ARSN 130 588 439, the 'Fund'). It contains summary information only to provide an insight into how we make our investment decisions. This information does not constitute advice or recommendations, and is subject to change without notice. It does not take into account the objectives, financial situation or needs of any investor which should be considered before investing. Investors should consider a copy of the current Product Disclosure Statement which available from us, and seek their own financial advice prior to investing. The PDS explains how the Fund's Net Asset Value is calculated. Past performance is not a reliable guide to future performance and the capital and income of any investment may go down as well as up due to various market forces. The investment objective is not a forecast, and is only an indication of what the investment strategy aims to achieve over the medium to long term.

1. Returns are calculated from exit price to exit price assuming the reinvestment of distributions for the period as stated and represent the combined income and capital return. The Index is the MSCI All Country Asia ex Japan Net Total Return Index in Australian dollars, net dividends reinvested. See www.msci.com for further information on the Index.
