

Monthly Update

30 SEPTEMBER 2018

Fund commentary

- Further escalation of trade tensions negatively impacted Asian markets in September
- Continued US Dollar strength puts pressure on Asian economies, heightening pre-existing growth concerns

iCar Asia declined 10% despite no material company specific information coming to market. We attribute the decline to the company's small cap status, lower liquidity and Asian exposure that all act as negatives when investors become more risk averse. We continue to view the business favourably and believe the share price will react positively in the coming months as its Malaysia and Thailand operations become profitable - two major milestones for the company.

Macau gaming holdings, MGM China and Wynn Resorts, declined 16% and 14% respectively over the month, extending their recent declines. Given its reliance on mainland Chinese patronage, Macau has

been at the epicentre of concerns around a slowing Chinese economy and trade fears. A further escalation of trade tension in September coupled with the impact of Typhoon Mangkhut impacted negatively on Macau. Our long term investment thesis for Macau has not changed and these investments will be discussed in greater depth in the September quarterly.

Kunlun Energy advanced 10%, continuing the strong performance seen in August, after the release of better than expected interim results. After a 33% share price appreciation during the quarter we took the opportunity to reduce our position back to 3%.

PM Capital Limited, founded in 1998, is a globally-focussed fund manager that invests money on behalf of private clients, the clients of financial advisers and institutions. PM Capital's goal is to build long term wealth by investing in global markets with patience and conviction.

Investment philosophy

We aim to build long term wealth together with our co-investors by finding and exploiting investment anomalies. Using a focused, patient and considered approach to finding simple investment ideas produces the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. This mispricing can arise as a result of any number of reasons, but is most often associated with disruptive or cyclical change, new information which is misunderstood by the market as having a permanent impact when it is in fact transitory, or just because they are operating in a sector out of favour with investors.

Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Who manages the investment?

Kevin Bertoli is the Portfolio Manager, who has over 12 years' industry experience and has managed the Fund since its inception. Kevin is supported by a team of experienced investment analysts. The investment team is led by founder and CIO Paul Moore who has over 31 years' experience in successfully managing investment funds.

Further Information

www.pmcapital.com.au T: +612 8243 0888 E: pmcapital@pmcapital.com.au

We believe in being a patient investor, one that has conviction, one that sees opportunities where others only see risk. We only invest in what we know, deeply, via our fundamental research.

Why the Asian Companies Fund?

Asia-specific: The Fund focuses on companies listed or operating in Asia (ex-Japan), giving unrestricted exposure to the world's fastest growing region.

Established: The Fund's process has been shown to be effective, based on a philosophy developed by Paul Moore, over 31 years. This has produced attractive long term capital growth.

Unrestricted: We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify in individual stocks. No conviction at the stock level = no investment.

Opportunistic and focused: The Fund is not built around a general market benchmark or index - it is highly focused based on our fundamental, bottom-up investment process. As a guide, the Fund holds around 15 - 35 deeply researched stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: Our co-investors receive access to a unique subset of opportunities to which they may otherwise find difficult to access. The management team have significant investments in the Fund - they invest for and with you.

Outperformance: The Fund *has outperformed the relevant market index by 178% since inception*. The Fund is managed from an Australian investor's perspective with consideration for tax and currency outcomes.

Key Fund Details
