

Monthly Update

Fund commentary

- Our gaming stock holdings post significant gains
- Portfolio holding Samsung to benefit from a more rational competitive landscape

Gaming stocks performed solidly over the month with MGM China, Wynn Resorts, Melco Resorts and Nagacorp all advancing over 15%. The regional gaming sector benefits from its higher relative beta compared to the wider market and this was no exception in January. Better than expected Q4 results from Wynn Resorts in late January also alleviated concerns around the severity of the slowdown in Macau.

Samsung Electronics advanced 18% after all three major players in the DRAM market - Samsung Electronics, Hynix and Micron - indicated they would reduce investment into new capacity after recent demand softness. A more rational competitive environment within the DRAM market, which has historically been highly

cyclical, is one of the key elements of our investment thesis.

iCar Asia released strong Q4 cash flows in January. iCar's operating trends continue to improve with both Malaysia and Thailand in a breakeven position. However, technical factors saw significant volatility in the stock and it closed down 8% for the month. We continue to view the operational progress made by iCar's management positively.

During the month we continued to reduce our positions in the Malaysian brewing space with a further sell down of Carlsberg Malaysia which is trading near its 12 month highs.

PM Capital Limited, founded in 1998, is a globally-focussed fund manager that invests money on behalf of private clients, the clients of financial advisers and institutions. PM Capital's goal is to build long term wealth by investing in global markets with patience and conviction.

Investment philosophy

We aim to build long term wealth together with our co-investors by finding and exploiting investment anomalies. Using a focused, patient and considered approach to finding simple investment ideas produces the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. This mispricing can arise as a result of any number of reasons, but is most often associated with disruptive or cyclical change, new information which is misunderstood by the market as having a permanent impact when it is in fact transitory, or just because they are operating in a sector out of favour with investors.

Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Who manages the investment?

Kevin Bertoli is the Portfolio Manager, who has over 13 years' industry experience and has managed the Fund since its inception. Kevin is supported by a team of experienced investment analysts. The investment team is led by founder and CIO Paul Moore who has over 32 years' experience in successfully managing investment funds.

Further Information

We believe in being a patient investor, one that has conviction, one that sees opportunities where others only see risk. We only invest in what we know, deeply, via our fundamental research.

Why the Asian Companies Fund?

Asia-specific: The Fund focuses on companies listed or operating in Asia (ex-Japan), giving unrestricted exposure to the world's fastest growing region.

Established: The Fund's process has been shown to be effective, based on a philosophy developed by Paul Moore, over 32 years. This has produced attractive long term capital growth.

Unrestricted: We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify in individual stocks. No conviction at the stock level = no investment.

Opportunistic and focused: The Fund is not built around a general market benchmark or index - it is highly focused based on our fundamental, bottom-up investment process. As a guide, the Fund holds around 15 - 35 deeply researched stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: Our co-investors receive access to a unique subset of opportunities to which they may otherwise find difficult to access. The management team have significant investments in the Fund - they invest for and with you.

Outperformance: The Fund *has outperformed the relevant market index by 149% since inception*. The Fund is managed from an Australian investor's perspective with consideration for tax and currency outcomes.
