Fund commentary

- Gold miner Newmont contributed positively to performance. Detractors included BHP, Mineral Resources, and steelmaking-coal miners Coronado and Stanmore, which all traded poorly during the month.
- Valuations in the resource and energy sectors are depressed. We see excellent investment opportunities longer term in our holdings but market sentiment is negative and the stocks are trading with high volatility. Stanmore gave a strong half-year update in late August, declared a dividend and reduced cost guidance, but the positive developments were overshadowed by fears around steelmaking coal prices.
- The Fund added to its position in Mineral Resources. Purchases were towards the end of the month and at an attractive long-term valuation, albeit the stock has continued to trade poorly and with high volatility since.
- At month end, the Fund's net equity position was 78% with an additional 16% in credit securities.

Investor profile

The Fund may be appropriate for investors seeking capital appreciation over a seven plus year investment horizon.

Important Notice

This Report is issued by PM Capital Limited ABN 69 083 644 731 AFSL 230222 as responsible entity for the PM Capital Australian Companies Fund (ARSN 092 434 467, the 'Fund'). It contains summary information only to provide an insight into how we make our investment decisions. This information does not constitute advice or recommendations, and is subject to change without notice. It does not take into account the objectives, financial situation or needs of any investor which should be considered before investing. Investors should consider the Target Market Determination and the current Product Disclosure Statement (which are available on the PM Capital website), and obtain their own financial advice prior to making an investment decision. The PDS explains how the Fund's Net Asset Value is calculated. Past performance is not a reliable guide to future performance and the capital and income of any investment may go down as well as up due to various market forces. The investment objective is not a forecast, and is only an indication of what the investment strategy aims to achieve over the medium to long term.

1. Returns are calculated from exit price to exit price assuming the reinvestment of distributions for the period as stated and represent the combined income and capital return. The Index is the S&P / ASX 200 Accumulation Index. See www.asx.com.au for further information on the Index.
