

Monthly Update

Fund commentary

- Brexit disorder takes its toll on May
- With plenty of cash, the Fund is in a strong position to capitalise on volatility

Credit markets were notably weaker over the month. However, pleasingly we preserved the Fund's capital.

UK politicians (perhaps unsurprisingly at this point) found new ways to fumble Brexit negotiations, culminating in the expedited resignation of Prime Minister May. Additionally, prospects of a trade deal between the US and China again seem further away as negotiations broke down and the US is back to talking tough on tariffs.

Some of the Fund's exposures to Irish and British-based businesses in property, banking and retail were softer over the month on the back of the Brexit noise. Names such as Allied Irish Bank, Cairn Homes and Tesco were weaker. We are firmly of the view that these businesses have sound fundamentals

and longer term are well placed to deliver on their respective strategies.

NAB's income securities continued to perform well as demand for bank yield investments picked up post the Australian election result. Our position in local infrastructure services company Qube Holdings also performed well. While there is nothing new to report, we do get the sense that the market is increasingly recognising the value of Qube's vertically integrated business model.

With over 40% of the Fund's capital currently sitting in cash, we are well placed to take advantage of the current market volatility, and expect to add to the Fund's investments near term.

PM Capital Limited, founded in 1998, is a globally-focussed fund manager that invests money on behalf of private clients, the clients of financial advisers and institutions. PM Capital's goal is to build long term wealth by investing in global markets with patience and conviction.

Investment philosophy

We aim to build long term wealth together with our co-investors by finding and exploiting investment anomalies around the world. Using a focused, patient and considered approach to finding simple investment ideas produces the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. This mispricing can arise as a result of any number of reasons, but is most often associated with disruptive or cyclical change, new information which is misunderstood by the market as having a permanent impact when it is in fact transitory, or just because they are operating in a sector out of favour with investors.

Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Who manages the investment?

Jarod Dawson is the Portfolio Manager and has been managing the portfolio since 2004. Assisted by John Whelan, together they have over 36 years' combined industry experience. Jarod and John are also supported by the broader investment team, with Paul Moore as CIO who has over 32 years' experience in successfully managing investment funds.

Why the Enhanced Yield Fund?

Dependable: A minimum 20% cash position helps the Fund to preserve capital and achieve its return objectives with low volatility. The Fund's process is effective and repeatable, based on an effective philosophy. This Fund has been producing attractive returns for co-investors for more than 15 years, and is one of the longest running yield funds of its kind.

Careful: We have an authentic investment process where our exposure to industry sectors, geographic regions or market capitalisation is determined solely by our conviction in individual risk/reward opportunities that we identify. All holdings within the Fund have been intensively researched by our investment team. No conviction = no investment.

Co-investment: Our co-investors receive access to a unique subset of opportunities which they would otherwise find difficult to replicate. PM Capital and some of its staff have meaningful investments in the Fund - they invest for and with you.

Key Fund Details

Fund category

Fixed income

Investment style

Fundamental, bottom-up-research intensive approach

Inception date

1 March 2002

Fund size

\$549.8 million

Strategy size

\$846.4 million

Minimum direct investment

\$20,000

Recommended investment time

Two years plus

Fees (p.a.)

*Performance Fee Option:

Management fee: 0.55%.

Performance fee: 25% of net excess above RBA Cash Rate (subject to a high watermark).

**Management Fee Option - Class B units:

Management Fee: 0.79%.

Buy / sell spread

0.2% (Round trip)

Investor profile

The Fund may be appropriate for investors seeking capital preservation and potential return in excess of the Reserve Bank of Australia's (RBA) cash rate with a low degree of volatility.

Important Notice

This Report is issued by PM Capital Limited ABN 69 083 644 731 AFSL 230222 as responsible entity for the PM Capital Enhanced Yield Fund (ARSN 099 581 558, the 'Fund'). It contains summary information only to provide an insight into how we make our investment decisions. This information does not constitute advice or a recommendation, and is subject to change without notice. It does not take into account the objectives, financial situation or needs of any investor which should be considered before investing. Investors should consider a copy of the Product Disclosure Statement which is available from us, and seek their own financial advice prior to investing. The PDS explains how the Fund's Net Asset Value is calculated. Past performance is not a reliable guide to future performance and the capital and income of any investment may go down as well as up. The investment objective is not a forecast, and is only an indication of what the investment strategy aims to achieve over the medium to long term.

1. Returns are calculated from exit price to exit price assuming the reinvestment of distributions for the period as stated and represent the combined income and capital return. The Index is RBA Cash Rate. See www.rba.gov.au for further information.
