## Fund commentary

- Key contributors to the portfolio in October were the US financial holdings including Apollo Global Management and Wells Fargo. Third-quarter results were strong, and loan growth, which had slowed when the Federal Reserve raised interest rates, is now beginning to recover.
- Key detractors included mineral resource holdings Newmont Mining and Teck Resources, as well as the Australian dollar weakness.
- Portfolio activity during October included small additions across European industrial holdings and Newmont Mining, and trimming of Apollo Global Management.

The Fund may be appropriate for investors seeking capital appreciation over a seven plus year investment horizon.

### Important Notice

This Report is issued by PM Capital Limited ABN 69 083 644 731 AFSL 230222 as responsible entity for the PM Capital Global Companies Fund (ARSN 092 434 618, the 'Fund'). It contains summary information only to provide an insight into how we make our investment decisions. This information does not constitute advice or recommendations, and is subject to change without notice. It does not take into account the objectives, financial situation or needs of any investor which should be considered before investing. Investors should consider the Target Market Determination and the current Product Disclosure Statement (which are available on the PM Capital website), and obtain their own financial advice prior to making an investment decision. The PDS explains how the Fund's Net Asset Value is calculated. Past performance is not a reliable guide to future performance and the capital and income of any investment may go down as well as up due to various market forces. The investment objective is not a forecast, and is only an indication of what the investment strategy aims to achieve over the medium to long term. The Index is the MSCI World Net Total Return Index in Australian dollars, net dividends reinvested. See [www.msci.com](http://www.msci.com) for further information on the Index.
