

Net Tangible Assets & Monthly Investment Report

31 DECEMBER 2018

Company commentary

- Global equity markets fall sharply
- Banking stocks retreat on the back of lower interest rates

Global equities fell sharply in December as uncertainty over global growth, interest rates and geopolitical issues dominated markets. The extraordinary market conditions saw the United States S&P500 Index fall 9.2% - its largest December fall since 1931. European markets also retreated in the midst of the global uncertainty. High yield corporate bonds spreads widened and the Australian Dollar fell 4% against the US Dollar. Meanwhile, the 10-year Treasury bond yield fell roughly 30 basis points to 2.7%, the Japanese Yen rallied and yields on 10-year Japanese government bonds returned to below zero.

The volatile market conditions and falling interest

rates saw our US bank stocks fare poorly. We believe that bank valuations are low, and we remain confident in the underlying businesses. The American consumer is still strong, delinquency rates on both commercial and retail loans remain acceptable and the banks are well capitalised.

Our European banking and property holdings also fell, particularly those with Irish exposure. The weaker economic and interest rate outlook in the Eurozone led the market to doubt the banks' potential earning growth, while uncertainty around Brexit remains an additional factor weighing on our holdings.

Net Tangible Asset (NTA) backing per ordinary share (After fees and expenses, all figures are unaudited) ¹	November 2018	December 2018	Change	Perf. since incept. - p.a. ⁴	Perf. since incept. - total ⁴
NTA before tax accruals plus franking credits ²	1.2788	1.1985	- 6.3%	9.08%	55.13%
NTA after tax ³	1.2019	1.1459	- 4.7%		

1. Past performance is not a reliable indicator of future performance. 2. 31 December 2018 includes \$0.0258 of franking credits. 3. Net Tangible Assets (NTA) refers to the net assets of the Company after the accruals for net current and deferred tax liabilities/assets. 4. Performance adjusted for capital flows including those associated with the payment of dividends, share issuance as a result of option exercise, and the dividend reinvestment plan, and including the value of franking credits.

PM Capital Limited (‘the Manager’), founded in 1998, is a globally-focussed fund manager that invests money on behalf of private clients, the clients of financial advisers and institutions. PM Capital’s goal is to build long term wealth by investing in global markets with patience and conviction.

Company profile

The PM Capital Global Opportunities Fund Limited (ASX:PGF, ACN 166 064 875) provides investors with an opportunity to invest in global equities via an Australian Securities Exchange (ASX) listed investment company. The company began trading on the ASX on 12 December 2013.

Managed by PM Capital Limited, the aim is to create long term wealth through a concentrated portfolio of around 40 global companies that we believe are trading at prices different to their intrinsic values.

Who manages the Company’s portfolio?

PGF’s investment portfolio is managed by PM Capital (AFSL 230222). The investment team is led by founder and CIO Paul Moore who has over 31 years’ experience in successfully managing investment funds. Paul Moore is the Portfolio Manager and is supported by a team of experienced investment analysts.

PM Capital believes in being a patient investor, one that has conviction, one that finds opportunities where others can only see risk. We only invest in what we know, deeply, via our fundamental research.

Investment philosophy

PM Capital aims to build long term wealth together with our co-investors by finding and exploiting investment anomalies around the world. Using a focused, patient and considered approach to finding simple investment ideas produces

the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Why the PM Capital Global Opportunities Fund Limited?

Established: The Company’s process has been shown to be effective, based on a philosophy developed by Paul Moore, over 31 years. This has produced attractive long term capital growth.

Unrestricted: We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify in individual stocks. No conviction at the stock level = no investment.

Opportunistic and focused: The Company’s portfolio is not built around a general market benchmark or index - it is highly focused based on our fundamental, bottom-up investment process. As a guide, the portfolio holds around 40 deeply researched stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: Shareholders receive access to a unique subset of opportunities to which they may otherwise find difficult to access. The Manager has a significant investment in the Company - they invest for and with you.
