Company commentary

- US Federal Reserve cuts rates for the first time in a decade
- Brexit uncertainty hurts Irish holdings
- Intercontinental Exchange holding exited

Portfolio holding Alphabet, the parent company of Google, reported second quarter earnings during July and rose over 10% after their release. Revenue growth accelerated in the quarter and management announced a \$25 billion stock buyback, larger than anticipated. The announcement pleased market analysts, who understood it to signal more focus on capital allocation going forward. This can create tangible benefits for the company, as it maintains more than \$100 billion in cash and marketable securities on its balance sheet - over 10% of its market capitalisation.

During July we exited our holding in Intercontinental Exchange. Held since 2014 and still an excellent business, we believe the stock price now trades at a fair-to-full multiple, incorporating the firm's market position and growth opportunities.

Among the poor performers for the month were our Irish holdings – both property and banking – which have traded down on the uncertainty around Brexit negotiations. We are visiting Ireland in September to speak with management and assess the businesses' fundamentals. We will provide an update in due course.

Net Tangible Asset (NTA) backing per ordinary share (After fees and expenses, all figures are unaudited) ¹	June 2019	July 2019	Change	Perf. since incept. - p.a. ⁴	Perf. since incept. - total ⁴
NTA before tax accruals ²	1.3179	1.3466	2.2%	11.2%	82.1%
NTA after tax ³	1.2533	1.2737	1.6%		

1. Past performance is not a reliable indicator of future performance. 2. NTA before tax accruals does not include franking credits. Franking credits per share are \$0.031. 3. Net Tangible Assets (NTA) refers to the net assets of the Company after the accruals for net current and deferred tax liabilities/assets. 4. Performance adjusted for capital flows including those associated with the payment of dividends, share issuance as a result of option exercise, and the dividend reinvestment plan, and including the value of franking credits.

PM Capital Limited ('the Manager'), founded in 1998, is a leading Australian based fund manager that has successfully achieved its goal of building long term wealth for its clients by investing in global markets with patience and conviction.

Company profile

The PM Capital Global Opportunities Fund Limited (ASX:PGF, ACN 166 064 875), which began trading of the ASX on 12 December 2013, provides investors with an opportunity to invest in global equities via an Australian Securities Exchange (ASX) listed investment company.

Managed by PM Capital (AFSL 230222), the aim is to create long term wealth through a concentrated portfolio of around 40 global companies that it believes are trading at prices different to their intrinsic values.

PM Capital has been operating its global investment strategy via an unlisted fund since October 1998. This unlisted fund's performance adjusted to reflect PGF's fee structure has produced a total pre-tax return of 651% vs the MSCI World Net Total Return Index (AUD) of 178% to 31 July 2019.

Manager's comparable track record

Who manages the Company's portfolio?

The Portfolio manager for the Fund and CIO is Paul Moore. Paul, is supported by a team of experienced investment analysts.

Investment philosophy

PM Capital aims to build long term wealth together with our co-investors by finding and exploiting investment anomalies

around the world. Using a focused, patient and considered approach to finding simple investment ideas produces the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Why the PM Capital Global Opportunities Fund Limited?

Established: The Company's process has been shown to be effective, based on a philosophy developed by Paul Moore, over 32 years.

Unrestricted: We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify in individual stocks. No conviction at the stock level = no investment.

Opportunistic and focused: The Company's portfolio is not built around a general market benchmark or index - it is highly focused based on our fundamental, bottom-up investment process. The portfolio only holds those stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: The Manager has a significant investment in the Company - it invests with and for you.
